communication and electronic engineer. junior Member of the Defense Cybersecurity Analysts team. Passionate about different technologies, committed to continuous improvement and lifelong learning, my primary mission is to protect digital assets and effectively respond to cyber threats.

EXPERIENCE

CCNAv7 Training   Jul 2023 - Aug 2024

National Telecommunication Institute (NTI)

This course provides essential networking skills for configuring, managing, and troubleshooting Cisco networks. Learn IP addressing, subnetting, routing, switching, VLANs, wireless networking, and network security.

Cisco Cybersecurity Engineer   Jul 2024 - Present

Digital Egypt Pioneers Initiative - DEPI

This course providescan do the following with Cisco

techniques; Planning, implementing, managing, monitoring and improving safety

Take action in accordance with best practices and company procedures

Securing the organization's data, systems and networks, such as encryption,

Authentication, authorization, etc. Troubleshoot security and network issues

and all systems and network security and/or configuration and

Implement intrusion detection systems, firewalls, documentation and reporting

Configure security, status, incidents, firewall protection, and default property

Networking, web protocols, email security, virus and threat detection

Performing, testing and verifying systems, vulnerability and risk assessments

System for software and hardware vulnerabilities.

EDUCATION

Bachelor of Communication and Electronic   Sep 2020 - Jul 2025

Higher Technological Institute, 10th of Ramadan City

Student at the Higher Technological Institute, 10th of Ramadan, Faculty Communication and Electronic engineering, specializing in networks Technology, in 2024During my academic journey, I developed a robust understanding of computing, networks and cybersecurity concepts. I'm still studying my degree with a GPA of 3.05/4.

TECHNICAL SKILLS

- Strong understanding of web vulnerabilities (SQL injection, XSS, CSRF) and mitigation techniques.
- Familiar with networking/network security basics.
- Experienced Capture the Flag (CTF) player.
- beginner user of Kali Linux.
- Skills of security operation center level 1.
- Using Wireshark.
- Good in configure devices of network

SOFT Skills

- Team Work.
- Time Management.
- Communication .
- Problem Solving.

CERTIFICATES

- **(CCNAv7 200-301) Cisco Certified Network Associate**
- **Cisco Cybersecurity Engineer**

COURSES

- Operating system operation knowledge (windows/Linux).
- CCNAv7.
- Basics in Linux.
- Programming: Python, C++, SQL.
- Security operation center analyst level 1

LANGUAGES

- Arabic – Native
- English - Good
